**OFFICE OF THE GOVERNOR  
NEVADA STATE OFFICE OF ENERGY**

December 17, 2012

O. Thomas Neal  
Neal Energy Management LLC  
P.O. Box 61045  
Boulder City, NV 89006

Dear Mr. Neal:

The Nevada State Office of Energy is assigned by the Governor to support the development and conservation of energy and use of renewable energy within the State. Encouraging energy efficiency is an important element of this responsibility.

Neal Energy has proposed a patented system using high-heat storage of eutectic salts designed to save energy and reduce energy consumption in commercial buildings, in addition to having job-creation potential and providing savings to energy consumers.

We encourage the continued development of technologies that support the Nevada State Energy Plan found in NRS 701.190. Recognizing that the Nevada State Energy Policy encourages energy efficiency within the state, the proposed development of this technology will help Nevada meet its energy efficiency goals. Therefore, the Nevada State Office of Energy offers its support for the development of this technology.

Should you have any questions, please do not hesitate to contact our office.

Sincerely,

A handwritten signature in cursive script that reads "Stacey Crowley".

Stacey Crowley  
Director / Acting Commissioner of Energy
